## Experience

### Full Stack Developer

Pilar, Buenos Aires, Argentina

Sirius Software

Nov 2020 – Present

- **Dynamai:** I configured, deployed and integrated to the existing application a CMS called Strapi. Also, I worked on fixing various issues and implemented some features like social media login using React Native.
- **Hub Technical Sales:** Led the development of interactive, optimized, and scalable features using React. Played a key role in implementing a Salesforce integration on the frontend, enhancing data accessibility and streamlining processes for a more seamless user experience.
- **DateSpot:** Worked as a full-stack developer using React, Node.js and MongoDB. Also, did some DevOps tasks like DNS configuration, environments setup, server configurations, etc.
- **Sawyer:** Took ownership of features as a full-stack developer using React and Ruby on Rails with a special focus in performance, scalability and testing.
- **Technical Expert:** Led the frontend training team, conducted code reviews, and provided guidance for a Ruby on Rails and React project.

### Intern

Campana, Buenos Aires, Argentina

Universidad Tecnológica Nacional - FRD

Mar 2019 – Dec 2020

- Conducted research and development tasks in the Information Systems Engineering lab.
